

PITHANI SATYA SREE

Andhra Pradesh, India — +91 9121614811 — satyapithani26@gmail.com
linkedin.com/in/satya-sree-pithani — github.com/satya7819

PROFESSIONAL SUMMARY

Recent Computer Science Engineering graduate with basic knowledge of Python, SQL, HTML, CSS, Bootstrap and Machine Learning. Passionate about learning new technologies and building a career in the IT industry. Quick learner with a positive attitude and a willingness to adapt to new challenges. Seeking an entry-level opportunity to apply technical knowledge, gain practical experience, and contribute to organizational growth while continuously developing professional skills.

TECHNICAL SKILLS

Programming Language: Python
Web Technologies: HTML5, CSS3, Bootstrap
Microsoft Office: Word, Excel, PowerPoint
Database: Structured Query Language
AI and Machine Learning: Basic AI concepts , Machine Learning
Python Libraries: NumPy, Pandas, OpenCV

EDUCATION

RIET College, JNTUK - B.Tech (CSE) CGPA: 8.17	2022–2026
Vidhyanidi Junior College - Intermediate (MPC) CGPA: 7.69	2020–2022
Little Flower Grammar Digi High School - SSC CGPA: 9.8	2019-2020

INTERNSHIP EXPERIENCE

Assistant Software Developer Intern (Amaravati Software Innovations Pvt. Ltd.) • Worked on frontend web development using HTML5, CSS3, and Bootstrap to design and develop responsive web applications.	May 2024 – Jul 2024
Artificial Intelligence Intern (Talent Trek E-Learning Pvt. Ltd.) • Engineered and trained Python libraries using NumPy, Pandas and OpenCV, improving prediction accuracy on real-world datasets.	May 2025 – Jul 2025

PROJECTS

Brain Tumor Detection System

- Developed a CNN-based deep learning application using Python, TensorFlow, and OpenCV.
- Implemented image processing, model training, testing, and performance evaluation.
- Optimized model accuracy through debugging, data preprocessing, and validation techniques.

Weather Web Application

- Built a responsive frontend web application using HTML5, CSS3, Bootstrap, and JavaScript.
- Integrated REST API to fetch and display real-time weather data dynamically.

Leveraging LSTM Network for Spam Detection in Real-Time Chat Messages

- Built an LSTM-based deep learning model for real-time spam classification with improved accuracy.
- Applied text preprocessing, tokenization, and feature extraction using Python.
- Trained the neural network using TensorFlow/Keras to improve spam detection accuracy.

CERTIFICATIONS

Data Analytics Job Simulation - Deloitte (2026)
Programming in Python – NPTEL (2025)
Fundamentals of Artificial Intelligence – NPTEL IIT Guwahati (2025)
Artificial Intelligence – Infosys Springboard (2025)

SOFT SKILLS

- Adaptability
- Communication
- Team Work

LANGUAGES

- English
- Telugu
